

User Prompt

Context: Act as experienced Product owner, Test manager and design a test strategy document for ecommerce product along with shopify

Instructions: [MANDATORY] Ask me 5 Multiple choice questions one by one
[STRICTLY] Once after answering the first question, proceed with next question
[CRITICAL] Once after answering all the questions generate test strategy document in downloadable .pdf file

Output: Ready to copy output supporting for all document types which includes .txt and .docx with microsoft word . -Take the font size , font type all details in a enterprise grade

Question 1

What is the primary business model of the ecommerce platform?

- A. B2C (Business to Consumer)
- B. B2B (Business to Business)
- C. Marketplace / Multi-vendor
- D. Subscription-based Ecommerce
- E. Hybrid (Combination of multiple models)

Answer 1

B2C

Question 2

What is the expected scale of the ecommerce platform?

- A. Startup / Small Business (Below 10k users/month)
- B. Mid-size Business (10k–100k users/month)
- C. Enterprise Scale (100k–1M users/month)
- D. Global High Traffic Platform (1M+ users/month)
- E. Seasonal / Event-based High Traffic Platform

Answer 2

Option A

Question 3

Which Shopify setup will be used for the ecommerce solution?

- A. Standard Shopify Store
- B. Shopify Plus
- C. Headless Commerce with Shopify Backend
- D. Multi-store / Multi-region Shopify Setup
- E. Not finalized yet / Need recommendations

Answer 3

Option C

Question 4

What are the major integrations expected in the ecommerce platform?

- A. Payment Gateway only
- B. Payment + Shipping + SMS/Email Notifications
- C. ERP / CRM + Inventory + Analytics Integrations
- D. Third-party Marketplaces (Amazon, eBay, etc.)
- E. Full Enterprise Integrations (ERP, CRM, OMS, WMS, Analytics, Marketing Automation)

Answer 4

Option B

Question 5

What level of testing coverage do you want in the test strategy?

- A. Functional Testing only
- B. Functional + Integration Testing
- C. End-to-End + API + UI + Regression Testing
- D. Full QA Coverage including Performance, Security, Accessibility, and Automation
- E. Enterprise-grade QA Governance with CI/CD, Test Metrics, Risk-based Testing, and Compliance Audits

Answer 5

Option B

Ecommerce Product Test Strategy Document (Shopify Headless B2C)

1. Executive Summary

This Test Strategy document defines the quality assurance approach for a B2C Ecommerce platform using a

Headless Commerce architecture with Shopify backend integration.

The platform targets startup/small-business scale traffic and includes integrations for Payment, Shipping, and Notification services.

2. Project Scope

In Scope:

- Shopify backend integration
- Product catalog management
- Cart and checkout workflows
- Customer registration/login
- Payment gateway integration
- Shipping integration
- SMS and Email notifications
- API integration testing

- Frontend and backend integration validation

Out of Scope:

- ERP/CRM integrations
- Marketplace integrations
- Advanced performance engineering
- Compliance certification testing

3. Test Objectives

- Ensure all ecommerce business workflows operate correctly.
- Validate Shopify API integrations.
- Verify frontend and backend synchronization.
- Validate payment and shipping transaction accuracy.
- Minimize production defects and customer-impacting issues.

4. Testing Types

4.1 Functional Testing

- User authentication
- Product search and filtering
- Cart management
- Checkout validation
- Coupon and discount testing
- Order confirmation workflows

4.2 Integration Testing

- Shopify Storefront APIs
- Payment gateway integration
- Shipping provider integration
- SMS/Email notification workflows

4.3 API Testing

- REST/GraphQL API validation
- Authentication token validation
- API error handling
- Data consistency verification

4.4 Regression Testing

- Critical business workflow validation
- Checkout regression suite
- Product/order synchronization checks

4.5 UI Testing

- Responsive testing
- Browser compatibility testing
- Mobile/tablet compatibility

5. Shopify Headless Testing Strategy

- Validate Storefront API integrations
- Validate CMS/content synchronization
- Verify checkout redirection and session persistence
- Validate inventory synchronization
- Validate webhook processing

6. Test Environment Strategy

Environment Types:

- Development
- QA

- Staging
- Production Smoke Validation

Browsers:

- Chrome
- Firefox
- Safari
- Edge

Devices:

- Android
- iPhone
- Tablet

7. Test Data Management

- Test users
- Test products
- Sandbox payment accounts
- Mock shipping responses
- Notification templates

8. Entry and Exit Criteria

Entry Criteria:

- Requirements approved
- Test environment available
- APIs deployed
- Test data ready

Exit Criteria:

- Critical defects resolved
- Regression passed
- Integration validation completed
- UAT sign-off obtained

9. Defect Management

Severity Levels:

- Critical
- High
- Medium
- Low

Defect Lifecycle:

New ® Assigned ® In Progress ® Fixed ® Retest ® Closed

10. Risk Management

Key Risks:

- Shopify API downtime
- Payment transaction failures
- Session timeout issues
- Notification delivery failures

Mitigation:

- API monitoring
- Retry mechanisms
- Logging and alerting
- Backup validation plans

11. Automation Strategy

Recommended Tools:

- Selenium / Playwright
- Postman / REST Assured
- JMeter (future scalability)
- BrowserStack

Automation Scope:

- Smoke suite
- Checkout workflows
- API regression validation

12. Test Deliverables

- Test Strategy Document
- Test Plan
- Test Cases
- Defect Reports
- Test Summary Report

- Automation Reports

13. Roles and Responsibilities

Product Owner:

- Requirement validation
- Business approvals

Test Manager:

- QA governance
- Resource planning
- Metrics reporting

QA Team:

- Test execution
- Defect reporting
- Regression testing

14. Metrics and Reporting

- Test execution status
- Defect density
- Defect leakage
- Pass/fail ratio
- Regression coverage

15. Recommended Enterprise Standards

Document Font: Calibri

Heading Font Size: 16 pt

Body Font Size: 11 pt

Line Spacing: 1.15

Margins: Standard enterprise format
