

Manual Visual Regression Agent

Visual test agent development through vibe coding.

- Created Architecture.md file and implemented phase by phase
- Created Client-Server Architecture with Restful apis for backend
- Able to launch the html page and tested the visual testing features (Current Sprint and Regression)
- Implemented nice to have features like Image preview better user experience

<think>
The user wants me to transcribe the text from the provided image.

1.  **Analyze the image content**:
    * The image displays a user interface, likely a checkout or confirmation screen.
    * There is a main heading at the top.
    * There is a subheading or instruction text below the main heading.
    * There is a white card or container.
    * Inside the container, there is a label "Shipping to".
    * Below the label, there is an address "221B Baker Street".
    * At the bottom of the container, there is a blue button with text.

2.  **Transcribe the text line by line**:
    * **Heading**: "Confirm order"
    * **Subheading**: "Double-check details before placing your order."
    * **Label**: "Shipping to"
    * **Address**: "221B Baker Street"
    * **Button**: "Confirm order"

3.  **Format the output**:
    * The user requested "only the transcription".
    * I will list the text elements in the order they appear, separated by newlines.

    * Line 1: Confirm order
    * Line 2: Double-check details before placing your order.
    * Line 3: Shipping to
    * Line 4: 221B Baker Street
    * Line 5: Confirm order

4.  **Final Review**:
    * Check spelling: "Confirm", "order", "Double-check", "details", "before", "placing", "your",
    "Shipping", "to", "221B", "Baker", "Street". All looks correct.
